NONPROFIT MEDICAL CLINIC

# HEPATITIS C FREE RECOVERY COMMUNITIES™

Love The Golden Rule has treated Hepatitis C for years. **More than 3,000 people have reached cure** through our collaborative care.

In 2024 alone, LTGR treated approximately 90 people for Hep-C, including patients who received care through our free Hep-C program. Many continued or returned for healthcare after treatment.

We are building on that experience by working with recovery organizations, treatment providers, healthcare entities, and community organizations to create more connections to Hep-C care.

## THE PATHWAY

### From screening to confirmed cure.

**Hep-C is curable. Reaching cure depends on maintaining the connection through each stage of care.**

When that connection is lost, the opportunity for cure—and for the healthcare relationship that may follow—can be lost with it.

LTGR provides the structure and healthcare support to move from wherever care begins through confirmed cure.

## RECOVERY IS MORE THAN A CURE.

For many people, Hep-C care became an ongoing relationship with LTGR. In 2024, **roughly half of approximately 40 insured patients went on to establish primary care with us.**

That relationship created access to primary care and, when needed, HIV prevention, behavioral health, chronic disease management, preventive care, and other healthcare services.

**3,000+**

PEOPLE REACHED CURE

PRIMARY CARE WITH LTGR

## CREATING THE CONNECTION

A connection may begin with a **direct referral, LTGR providing testing onsite**, or a client using a **dedicated intake form** to connect directly with us.

When confirmatory testing is needed, LTGR can provide access **within one week** and initiate treatment **in under 30 days**.

We will work with you to establish the approach that works best for your organization and the people you serve, then manage the Hep-C care process through confirmed cure.

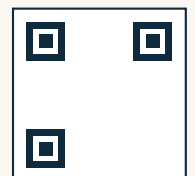

**The next step: establish how we connect the people you serve to Hep-C care.**
